

NEW YORK TEAM OUTMATCHED

So-Called "Big Five" Lost at Montpelier By Score of 36 to 1

SOME FINE PASSING AND PRETTY SHOTS

For a Time the Visiting Team Was More or Less Dangerous

The Montpelier American Legion basketball team defeated the Big Five from New York last evening in the armory in Montpelier by a score of 36 to 1. It was a pretty game, but few fouls being called and some very nice passing being shown by each team. Shea, the little player of the visiting team, caused Bartlett no small amount of uneasiness but both were fast players with the result that some excellent playing took place.

At the end of the second period the score was 24 to 12 in favor of Montpelier. In the early part of the third period the visiting team came ahead fast and threw a couple of baskets before the Montpelier team got under way and then the Montpelier boys saw that an accident might lose them the game and they lived up to a bit with the result that they threw three baskets in rapid succession.

Walker was hurt in the early part of the game so he did not play in the second period and Kelley, who went into the game, gave a good account of himself. He is not fully recovered from his recent illness of jaundice. Clark was in his usual good form and played a fast game, being backed up by the other members of the team so that he was able to get more baskets from the floor than the other players. He would get away from his opponents and be under the basket for one of the Montpelier players to throw to him.

Two of the visiting team are major league baseball players. The summary: Montpelier New York
Clark, f. Stark
Gross, f. Stapleton
Walker, c. G. Shea
Laird, c. Bartlett
Bartlett, g. G. Goldie
Laird, g. Kelley

Score, Montpelier 36, New York 18; baskets from the floor, Clark 8, Walker 3, Bartlett, Gross 2, Shea 1; free throws, Cullen, scorer, Shepherd; time, Abair; time, three 15-minute periods.

SATURN'S HAT ON CROOKED.

Rings and Angle on Planet, but It's Only 29-Year Resetting.

If it isn't one thing it's another. Now it seems that Saturn's hat is not on consequence. Professor Edwin B. Frost, and all sorts of awkward things are predicted for our poor little earth in consequence, Professor Edwin B. Frost, the astronomer in charge of the Yerkes observatory at Lake Geneva, Ill., has asserted that the big planet's rings, which really look at certain angles like the brim of a derby hat, are all on edge.

At their present angle, which is likely to persist for some weeks, they turn a knife edge to the earth and are hard to be seen at all. Usually Saturn presents a magnificent spectacle to the star-gazer with a good telescope, for it looks like a blazing grapefruit inserted in the middle of a luminous dinner plate—and that is just about the planet's relation to its three concentric rings, which have the visual effect of one.

With the edge of the dinner plate turned toward us we see virtually nothing but the grapefruit, and it looks like any other grapefruit. The thickness of the celestial dinner plate is only about 100 miles, according to Professor Frost's estimate, but the diameter of the rings forming the flat surface of that plate is something like 173,000 miles.

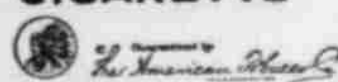

Professor Frost is not especially perturbed over the behavior of Saturn. Far from thinking it has anything to do with the late war, the eighteenth amendment or the famine in China, he says the tipping of the rings takes place every 29 years.—New York Sun.

\$1.50 A MONTH

Secures the best family medicine treatment, which is

Hood's Sarsaparilla

For the blood, stomach, liver and kidneys. Creates an appetite, aids digestion, makes food taste good.

More Than This

While it purifies, vitalizes and enriches the blood, it eradicates catarrh, scrofula, rheumatism, makes the weak strong. Gives you more real up-lift and help than any other treatment for three times the money. Get Hood's today.

A word to the wise is sufficient. For a wild, effective laxative, or active cathartic, take Hood's Pills.—Adv.

REPORT TUBERCULOSIS CURED.

D'Arsonval Notifies French Academy of Result of New Method After 7 Years.

After seven or eight years of observation Prof. D'Arsonval, member of the institute of the Academy of Medicine, has presented a report by a new method discovered by the Swiss bacteriologist, Henry Spahlinger. The method was first applied in 1913 and 1914, in hospitals in England, France and Switzerland, on patients suffering both from the minor forms and advanced phthisis.

Since that time patients who were pronounced cured have been kept under observation. All are declared to be alive and in good health, and they have shown no symptoms of relapse for the last six years, although they underwent no further anti-tuberculous treatment of any sort.

These results are vouched for, among others, by the London physician, Leonard B. Williams, fellow of the Royal Society of Medicine, and other scientific bodies.

The treatment takes the form of injections of antitoxins and ferments. It aims at eradicating acute symptoms, immunizing the patient, completing the cure and preventing a relapse.

As originally described before the Academy of Medicine by Prof. Letulle, the method consists of intramuscular injections of a combination of anti-genic solutions and ferments. It is claimed that the treatment causes the closure of lung cavities and disappearance of the bacilli.—The Standard (insurance paper).

PUNISHMENT REDUCED.

In Cases of "Vengeance Gang" Operating in Cairo Against British.

Cairo, Feb. 22.—Seven death sentences imposed by the court here last October on members of the "vengeance gang," an anti-British society, have been commuted to 15 years in prison. Among these were sentenced to death was Abdul Rahman Bey, former provisional governor. Fifteen of the men who were given heavy prison sentences have had the periods of their incarceration reduced, and eleven who were sentenced to receive thirty lashes have been liberated.

WAITSFIELD

The ladies' aid society will serve dinner in the diningroom of the Methodist church town meeting day, March 1, at 2 o'clock.

The women's missionary society of the Methodist church will hold its monthly meeting at the parsonage Friday afternoon, Feb. 28, at 2:30. Let everybody plan to be present and on time.

\$15 to \$30 a day. You can earn \$15 to \$30 and higher every day selling a nationally-advertised phonograph. Apply Barre Drug Co., Barre.—adv.

High School Notes.

Monday morning the juniors had charge of the assembly. The exercises were in honor of Lincoln's birthday. After the school sang "America, the Beautiful," Elvin Graves read a very interesting original sketch of Lincoln's life, and Clifford Wallis read "The Counsel Assigned."

Later in the day, the sophomores gave a valentine party. Two songs were sung by the school, one, "Old Waitsfield," the new school song which was written by a member of the class, and the other, "The Midshipmites." Then valentines were distributed. As each student had previously drawn a name and purchased a valentine for the person whose name he drew, everybody received one and had a merry time over it.

The juniors are making preparations for bringing out a Waitsfield high school year book. This book is to consist of pictures, jokes, stories, poems, songs and articles on the development of the school. A committee has been appointed to solicit advance subscriptions.

During Miss Dana's coming absence at the convention in Atlantic City, the state will furnish a supply teacher without any expense to the town.

Mrs. George Miller gave a delightful afternoon tea to Miss Dana and the members of the senior class last Thursday. The decorations were of purple and gold, the class colors, and Mrs. Miller wore deep lavender with a knot of gold at her throat. The Allen, Mabel Corlies, Orman Tucker and Melvin Livingston assisted with the serving. Miss Louise Gleason received with Mrs. Miller.

The interclass volleyball games are being played and have aroused a good deal of enthusiasm among both boys and girls. The following games have been played: Tuesday, the fifth year defeated the first and second year, score 49 to 10; Tuesday afternoon, sixth year defeated fifth year, score 20 to 11; Wednesday, sixth year won from third year students, score 29 to 20; Thursday, second year defeated third year, score 33 to 16.

Waitsfield was well represented at the recent district convention in Barre. Miss Dana spoke on the subject announced last week and Miss Perrine gave a talk on "Costume Design." State Supervisor H. O. Hutchinson also gave a short talk on the work we are doing in this school. From Barre, Mr. Abbott went to Burlington for the week end, and Miss Mullings to Middlebury, where her society, Sigma Kappa, is to give an initiation banquet. Miss Dana spent part of the week end at Goddard.

The Boys' Athletic association play, "Mr. Bob," is to be given the 24th of this month. Mr. Abbott is coach.

WORLD BIKE RECORD BROKEN

Percy O. Lawrence Made 30 Miles in 40 Minutes, 24 3-5 Seconds

WHEN MOTOR PACED AT MIAMI, FLA.

Previous Record for That Event Was Held By Clarence Carmen

Miami, Fla., Feb. 24.—Percy O. Lawrence, San Francisco cyclist, broke the world's 30-mile record for a motor paced race here last night, his time being 40 minutes, 24 3-5 seconds. The previous record of 41 minutes three-fifths seconds was made by Clarence Carmen several years ago.

AN AMERICAN LANGUAGE.

Need of a New and Composite Tongue to Be Peculiar to This People.

"A new language, more concise and forceful than any spoken, composed of all spoken languages and denominated 'American,' is the result which is expected by the state librarian of Ohio from a prize essay contest in that state on the subject, 'Why We Should Have an American Language.' Said librarian thinks personally that no red-blooded American ought to ape anyone in anything and gives the result of his observations at some point of greater consequence or other. He found in Chicago one Englishman to a thousand men of other tongues; ergo, the percentage of real English in the whole is not equal to the percentage of alcohol allowed by the law in beverages of to-day."

The gentleman in question will not find an agreement with him in critics in England who accuse us of speaking "American," not English. But such differences of opinion aside, the language used in the United States is English to all intents and purposes, although there are enough national peculiarities of word, phrase and expression to complicate translation on the other side of the big pond. There is, it is true, American slang, which some hold to be a language in itself. English, of course, has a slang of its own, but as Miss Edgeworth points out in her witty "Essay on Irish Bulls," the English slang is not only unimaginative, but also wholly pointless and even meaningless. American slang, on the contrary, is picturesque and full of idea and humor; in fact, not a few words and phrases have been legitimized in the dictionary for their real value. But these few cannot make a distinctive language. The idea of making up a tongue of our own by a melting pot process is one to amuse rather than suggest; it would take generations to get it considered seriously and a few more to get it adopted. Witness the experiments on that line with Esperanto, Volapuk, and even simplified spelling. Then the liveliest and most hopeful imagination might well shrink appalled at the result which would come out of the melting pot from the conglomeration therein of the languages and dialects of this continent and Europe. Writers on English claim that it is the most virile and meaningful of all the modern languages. The efforts of these are to rescue the use of the simple strength of the Anglo-Saxon among us from the floridity engrafted upon it by the Latin tongues. Moreover, the English language, true to its nativity, is looking out for more annexations to its use. As Latin is the language of science and French that of diplomacy and polite literature, so English aspires to be the universal language of the commerce of the globe. An attempt to abolish it here for a brand-new American language is going to be a work of gigantic proportions, with prospects of success nil.

And then why put more labor on the already overworked melting pot?—Baltimore American.

Railroad Man Dies.

Rutland, Feb. 24.—Sidney S. Colton of this city, assistant superintendent of the Rutland railroad, died Tuesday at the home of his son, Dr. Sidney Colton, in Johnstown, N. Y. He was 72 years old. He had been in poor health some months. Mr. Colton came here from Utica, N. Y., in 1902 and for several years was superintendent of the Rutland road, being made assistant when the New York Central took it over. Mr. Colton was employed by the Central at Utica. He is survived by his wife.

Piles

CURED

In 6 to 14 Days

All druggists are authorized to refund the money if PAZO OINTMENT fails to cure any case of ITCHING, BLIND, BLEEDING or PROTRUDING PILES. Cures ordinary cases in 6 days, the worst cases in 14 days.

PAZO OINTMENT instantly Relieves ITCHING PILES and you can get restful sleep after the first application.

It is guaranteed by Paris Medicine Co., St. Louis, Mo., Manufacturers of the world-famous Grove's Laxative Bromo-Quinine Tablets.

This signature is on every box of PAZO OINTMENT. 60c.

E. W. Brown

To Stop A Cough Quick!

Use a Double Treatment

Take HAYES' HEALING HONEY to heal and soothe the sore and tender tissues and lining membranes inside the throat.

Apply GROVE'S O-PEN-TRATE SALVE to chest and throat to allay fever, reduce inflammation and relieve congestion. The healing effect of HAYES' HEALING HONEY inside the throat combined with the action of GROVE'S O-PEN-TRATE SALVE through the pores of the skin soon opens the air passages, heals all inflammation and stops the cough.

Just ask your druggist for a bottle of HAYES' HEALING HONEY and you will find a box of GROVE'S O-PEN-TRATE SALVE enclosed therewith. The cost of the combined treatment is 35c. (Give it one trial.)

Cuticura

Talcum

Is so soothing and cooling for baby's tender skin after a bath with Cuticura Soap.

Sample Each Free by Mail. Address: "Cuticura Laboratories, Dept. 170, Malden 45, Mass." Sold every where. Soap 25c. Ointment 25c. and Talcum 50c. "Cuticura Soap" shaves without soap.

NO SECRET TREATY.

Says Chilean Official, Regarding Alliance Against United States.

Santiago, Chile, Feb. 24.—Reports that Chile has made secret treaties with Great Britain and Japan with a view to the eventualities of war between either one or both of those powers and the United States were denied to-day by Jorge Matte, Chilean foreign minister, in a conference with Joseph P. Shea, American ambassador. These reports, it is asserted, have been published abroad.

Senor Matte announced he asked Mr. Shea to inform his government that, while the government of Chile never had given importance to the rumors, it desired there should be no motive for a misunderstanding between the peoples of Chile and the United States.

FALLING BEAM HITS FIREMAN

And Three Others Dashed to Safety As Salem Factory Collapsed

8,000 BARRELS WERE DESTROYED

Flames Flared So High They Were Seen for Miles Away

Salem, Mass., Feb. 24.—One fireman was injured by a falling beam and three others dashed down ladders to safety just as a roof, from which they were fighting flames was about to collapse at a fire here early to-day. The blaze destroyed the factory of a barrel manufacturing concern.

More than 8,000 seasoned barrels were burned and the intense heat hampered the firemen. After the roof fell the flames flared so high that they were seen for several miles.

HOPE ABOUT GONE FOR IMPRISONED MINERS

There Are Seven Men in Mine at Dowell, Ill., Who Have Been Cut Off By Flames.

Duquoin, Ill., Feb. 24.—Hope had been virtually abandoned to-day for the rescue of any of the seven men imprisoned by fire, which started yesterday afternoon in a gallery of the Kathleen mine at Dowell, five miles south of here.

The fire, which is thought to have been caused by an electric wire coming in contact with a canvas curtain, continued to sweep the gallery, keeping rescue squads away from the vicinity where the miners were caught.

In the event other measures failed to check the fire, it was proposed to block up the gallery to keep the flames from spreading.

TOO TIRED TO WORK?

If you get up in the morning tired, if you weary with little exertion and if vim and go are lacking, depend upon it that your liver is torpid. One dose of Schenck's Mandrake Pills will "wake up" that lazy liver and make you feel like new. Schenck's Mandrake Pills are worth a trial tonight.

25c per box—uncoated or sugar coated Dr. J. H. Schenck & Son, Phila. Adv.

To Feel Fit to Work

you must keep your stomach well, your liver active, your bowels regular and blood pure.

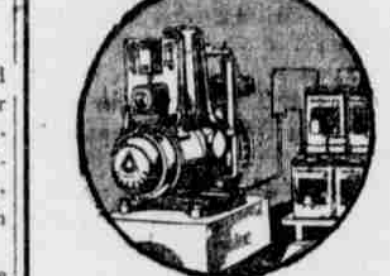

If you get up in the morning tired, if you get exhausted with the slightest exertion—you can depend upon it that your liver is torpid and needs waking up. A few doses of SEVEN BARKS, nature's great remedy, will "wake up" that lazy liver, and make you feel like new.

If your liver has been overworked, it would cause your whole system to fill up with acids and poisons that would make you feel weak, tired out and sick. You can easily remove the acids and poisons from your system by taking from 10 to 20 drops of SEVEN BARKS in a little water after meals. It will keep your bowels moving naturally every day, cleanse your system thoroughly eliminate undigested food, and bring you back to active and normal health again.

SEVEN BARKS is nature's remedy, made from the extracts of roots and herbs, and has stood the test for many, many years, and will certainly give you a feeling of new life and vigor. To feel fresh and fit for your daily duties, you must keep your stomach and liver active and bowels regular. To get and keep well ask your druggist for SEVEN BARKS. If he is out of it, he will get it for you. Accept no substitute. Price 60 cents.—Adv.

General Publicity Versus Applied Advertising

THERE are two kinds of advertising. One kind is called "general publicity." Sometimes it is further described in phrases like "atmosphere building," "national prestige," or appeal to "key consumers."

It is a glittering generality of thinly spread, country-wide appeal—the hit-or-miss way of trying to sell goods.

The other kind of advertising is "applied advertising."

There is nothing mysterious or indefinite about it. It is simply advertising in the columns of daily newspapers concentrated in the markets where the advertiser has a chance to sell goods.

It is definite, for it reaches all possible customers. Usually it tells them the merchant who sells the advertised goods.

Applied advertising makes sales. Its results can be weighed and

measured. It either pays or it does not. It generally does pay, and if it does not, the reason why can be quickly ascertained.

Manufacturers and distributors are today turning to newspaper advertising, for these are the days of intensive selling.

They want applied advertising because this is the kind that keeps the cash register bell ringing.

Manufacturers and distributors interested in the problems of modern merchandising are invited to write to the Bureau of Advertising, 806 World Building, New York, for a copy of the book, "National Advertising and the Newspapers."
